Ansible Automation Platform

Transforming Enterprise Automation

Island Networks is proud to present the Ansible Automation Platform, a cutting-edge enterprise solution designed to revolutionize system configuration, software deployment, and advanced workflow orchestration. This powerful platform is engineered to meet the needs of modern enterprises by seamlessly bridging traditional data centers with contemporary cloud services and beyond.

The Ansible Automation Platform empowers organizations to create, manage, and scale automation processes with unprecedented consistency and efficiency. With the latest iteration- Red Hat Ansible Automation Platform 2- users benefit from a reimagined architecture that includes innovative features such as automation mesh and execution environments. These enhancements offer a comprehensive suite of tools that enable developers and operations teams to scale automation efforts transparently and effectively across diverse environments.

Red Hat Ansible Automation Platform 2 provides a unified approach to automation, facilitating application deployment, system updates, and more, all within a streamlined and standardized framework. By leveraging these advanced capabilities, organizations can ensure robust, scalable automation solutions that adapt to their evolving needs.

Benefits

The **Enterprise Strategy Group** economic validation revealed that the Ansible Automation Platform has provided customers with significant savings and benefits, including:

- Faster time to automation capabilities
- Reducing operational complexity
- Reduced risk to the organization
- Streamlined deployment
- Enhanced scalability

Why Island Networks?

Island Networks is a global systems integrator and digital transformation provider with deep technology expertise. We focus on providing innovative digital, hybrid, and security solutions to large organizations across the US, Europe, and Asia. Our expertise enables us to help reduce the complexity, risks and costs associated with digital and hybrid transformation. While our focus on partnership and integrity helps our customers realize the full potential of technology and deliver change faster.
